An old Almanack after a new fashion.

Cœlestiall Calculations:

OR AN

EPHEMERIS

OF THE

Motions of the Sun, Moon, and Planets for the year of mans Redemption by JESUS CHRIST, 1658.

Wherein their Defects, Aspects, and Effects are Physiologically discussed; together with the Rising, Southing, and Setting of the Planets, and Astrologicall and Meteorologicall Judgments upon the same, in a new method delivered.

From whence is probably conjectured (not positively concluded) the state, condition, temperature and inclination of this present year, being the second from Leap or Bissextile year, and of CHRISTS Incarnation

M. DC. LIIX.

These necessary and perpetuall Tables shew their excellent use at the top of every columne, and are fitted for all places where the North pole is elevated 51 degrees, and will serve very well for 50 and 52. Take any one day of the yeare and adde the time of day br. and twy-light together, and it will make 12 hours. So also if you add together the time of ☉ ri. & ☉ set. that is your joyn the length of the day and night toge. the whole will be 24 ho. And if you add the length of a planetary hour by day, to the length of a planetary ho. by night, it will be 1 hours, which is the 12 part of a naturall day and night.

As for example. the 1. of Ian. Break of day is at 5. of the cl. 54. m. Twi-light 6 a cl. 6 m. both added makes 12 h. Sun riseth at 8 a cl. and sets at 4. both added makes 12. h. The day is 8 h. long, & the ni. 16. both added togeth. makes 24 h. Lastly, a planets ho. by day is 60 m. which is the part of a par. day; and a planets ho. by ni. is 1 ho. 20 m. which is the 1 p. part of that night, both added make 2 h. which is the 12. part of 24. Thus do for any other time or intermediate d. or n. by rule of proportion. Psal. 19. 2. *Clara luce lucens, & tenebræ tenebras, Ad suos menses viciſſim frequentes Incipit Aluerna cœlum aut parentis, Carmine laudes.*

Heavens sparkling fires, in swift incursions joyn,
Tossing the troubled air, and *Neptunes* brine.
The *Sun* and *Hermes* close, *Mars* darts his square,
Moves many tempests, 'tis but seldom fair.
Now those whose longing eyes for twilight waite,
Trepan themselves, encrapt with their own baite.

At Full Moon, *Sol* meets with *Jupiters* watry *Trine*,
Venus elects mad *Mars* her Valentine;
And she to him, her lodging do resigne,
But proves in that to be his Concubine.
Thus fairest Jems are blemisht with a crack,
And heavy tempted oft-times suffers wrack.

Set peeping 'twixt the horns of th' heavenly Ram,
Meets with *Joves* frown; Oh blessed is the name
Of grounded peace: Dull *Saturn* doth oppose,
Those acts which equall Justice would compose;
Thus, those are rul'd but badly, where the base
Do check the chief, that sit in highest place.

Hermes and *Saturn* facing one another,
Who at another time call, Brother, brother,
Are now contriving one anothers shame,
And railing Pamphlets flie without a name,
But let such know in this their enterprise,
They'l raise such dust as will put out their eyes.

The Sun with *Jupiter* being close combinde
And *Mars* with *Venus*, *Jove* with *Hermes* joyn'd,
What's their effects? 'tis dog dayes, and no wonder,
If fearfull lightnings chance with rain and thunder,
What ever haps, I meddle not with Kings,
I would write high, But dare not trust my Wings.

I not foreſee, nor can I apprehend,
Much to ſucceed; Although the Stars portend
Strange matters; yet if I foretell
Many are queſtion'd; ſure all is not well.
If *Mars* with *Hermes* joyn, and *Venus* too
With aged *Saturn*; ſomewhat is to do.

Pray what's the news? let's walk to the Exchange,
'Tis very dubious; Nay 'tis very strange,
What ailes the Emperour? what is that to me?
Portugal's King must act as well as he,
These very men are fortunes Tennis ball.
Now cast aloft, now dasht against the wall.

Exalted *Saturn*, and dejected *Mars*
Conjoin with *Sol*, God shield's from bloody jarrs;
He undisturb'd in storms and tempest rides,
That in a small bark by the calm shore glides,
While others proudly plow the brackish main,
Lye Shipwrackt, and their Anchors cast in Vain.

Mars entertains *Hermes* his gueſt, but mark
They'r moſt part hang'd i'th light, that rob i'th dark.
Ill deeds have ill ſucceſs; And thoſe who ſtrive
By wicked actions others to deprive
Of life or fortune in the end receive
The like reward; they wear ſuch, as they weave.

The world is strangely chang'd, when I was young,
Houses were open, Poor to rich did throng,
And fared well; The frost did binde the earth,
But now Heavens weep, and we have lost our mirth.
Seditious Pamphlets, Lawless lines, appear,
'Tis durty weather, and so ends the year.

Courteous *Readers*,

THere is little wanting in this yeares *Ephemeris*, saveing a Table of Houses, with which you may fit your self from an expired *Ephemeris*, or some other good Author. For those domifying Tables *sunt semper eadem*, and serve for ever in those latitudes they are calculated for; But the motions of the Planets require new calculation for every year, and reduction, &c. You have in this of mine, The dayly motions of all the Planets both in Longitude and Latitude, and the Moons Aspects to them in the Columnes of the longitude of that Planet you look for, which I conceive is very usefull, and easy to be understood. The Letters *a. h. m. n.* placed after the hours of the Aspects, have apt signification and easy to be remembred, *a*, signifies afternoon. *h*, before noon. *m*, morning. *n*, night. So likewise in the columne in the right hand page, which is for the riseing, southing, and setting of the Planets, you shall meet with the same Letters, and have the same signification, and though this last be not precisely (but in *numero rotundo*) calculated, yet it is of more difficulty then any of the rest, and hath very good use. I shall not need to explain any more, for the Titles of every columne speak for themselves. As for the Faires, and High wayes, and other vulger mean notions, heretofore mentioned in many annuall Almanacks, I shall not trouble my self or the Readers, I confesse they are things very usefull, and fit to be known, but they are not at all proper for a work of this nature, And any old *Erra Pater* will serve that purpose, yea if it were made 100 years agoe. And let the *Copernicans* say what they please of the motion of the Earth, and though there may be new Faires graunted to many places where none have been before, yet the Earth, Townes and Citryes stand in their old places; I now come to the proper matters fit to be handled in this present work.

Of the Spring.

EX hoc momento status Anni cognoscitur. It is a very tickliſh point, and many learned men, famous in their Generations, great *Mathematicians*, and excellent Artiſts have laboured much in the inveſtigation thereof. As yet *ſub judice lis eſt*, but Time is the Father of truth, and great hopes there is ſome able Artiſt will *Acu acu tangere*, and hit the nail on the head: I ſhall at preſent content my ſelf with the lateſt and beſt diſcoverie, and give you my Obſervations thereupon: I have learnt That *Sobrius intellectus in omnibus optimus eſt, multò facilius invenit Syderum Conditorem humilis pietas, quam ſiderum ordinem ſuperba curioſitas.* And *Ariſtotle* excellently well, *Ea quæ res evidentiès demonſtrare conantur ſimiliter facere debent. Ut ſi quis ſolem per tugurium offendere conetur.* Therefore upon Wedneſday the tenth of *March* this year at 9 minutes paſt ſeaven of the clock in the morning. The Sun entreth the firſt minute of *Aries*, At which time the 8 degree, 42 minutes of *Taurus* doth aſcend at *London*, *Jupiter* hath moſt dignities in this Quarter, For at the Suns ingreſſe he hath ſix: At the full Moon preventionall he hath 16. And at the new Moon poſt ventionall 12. And but 9 debilities in all, by which meanes he hath 23 fortitudes left him. *Venus* in the three figures hath 38 dignities, and 19 debilities, ſhe is endued with 19 cleer fortitudes; *Mars* hath ſome participation with them, for he hath 36 dignities in the whole, and debilitated by 23, ſo there remaines for him but 13 dignities. The Luminaries are but indifferently poſited, yet ſo as they bear ſome ſway, But *Saturn* and *Mercury* are the weakeſt of all, and exerciſe little of their power in this quarter, yet in the whole, *Mercury* is ſole Lord of the year accordingly to *Haly*, But deſervedly *Jupiter*, *Venus*, and *Mars* are the ſole Rulers of the *Spring* Quarter, which continues to the 21 of *June*. As for the poſition of *Jupiter* in *Cancer* in the end of the ſecond houſe, or rather upon the guſp of the third houſe, and in △ to *Mercury* Lord of the

ſecond

second at the Revolution, And at the full Moon preventionall, he is upon the end of the 12 house, and entring upon the Ascendant. And at the new Moon post Vencional, he is in the middle of the ninth house; And for that he is in his exaltation, and so continueth to the beginning of *August*. He promiseth much good to the people, and that by their own labour and industry they will profit themselves and augment their riches, and this to happen to those people Men and Women who shall have any of their chief significators at the time of their Birth in *Cancer*, &c. They shall likewise take pleasure with their Neighbours, acquaintance and Kinred, be charitable, and addicted to hospitality, and be successfull in their short journeys, as likewise in Sea Voyages; they shall also delight in good actions both morall and divine, Likewise the better sort of Jovialists, such as be Judges, Senators, Counsellors, &c. as also the true religious persons shall prosper happily in their affaires; But let the other sort expect sad afflictions, *Jupiter* in his Dominion ruleth the Northern parts, and the windes thence arising, now because he is in square to the Sun, he purgeth and cleereth the Ayre, and causeth a temperate season, and being in △ to *Mercury*, he causeth *Apertiones portarum*, and many times produceth very strong and turbulent winds, and for that both of them are in moist signes, rain is to be expected, but not of long continuance, nor much prejudicial. *Venus* is the next in power, at this Revolution of the *Spring* quarter, and being posited in the twelfth house. *Significat quod odio habebunt Viri mulieres, Vilipendent eas, et dominandi licentiam illis adiment.* However being in *Pisces*, her exaltation, and not much afflicted, but rather very powerfull and wholly free from any evill radiation and dispositrix of the Revolutionall Ascendant, and projecting her amicable sextile aspect thereunto: doth denote all necessary conveniences that may cause a fertility and fruitfulness to abound; and seasonable showers in due time for the refreshing of the earth, and temperate weather. And for that at the full Moon preventionall, she is very powe fully posited in the Midheaven, *Significat quod Reges, aut si qui licis to-*

vnion subsistuntur, benefacient illis, qui iocos et musicum re-
tinent; et status Regni (aut Reipub) erit tranquillus et florens.
And being posited at the new Moon post Verticall in *Ari-*
es her detriment, going to opposition of *Saturn*, she doth
signifie many infirmities to Women proceeding from in-
temperateneesse and surfetting of meats and drinks, and
great debility and weakness of the stomack, which is much
augmented by the unhappy conjunction of *Saturn*, and the
Moon at the *Suns* ingresse in the sixth house, causeing be-
sides, many other grievous diseases, As *Feavers*, *Quartans*,
Palsies, *Catharrs*, *Dropsies*, *Hollick Feavers*, the *Gout*, *Ele-*
phantiasis or the *Lepry*, *Morphew*, *Spanetick passions*, and
all other maladies which proceed from the blood infected
by a viscous flegme and melancholly: *Venus* in her do-
minion ruleth the *South winde*: *Mars* the next significa-
is in *Gemini*, in the end of the ascendant of the Revolution,
and in Square to *Mercury*, who is Lord of his place, and
the second house, and the *Dragons taile* is there also with
the Bulls eye, a Star of violent and impetuous nature,
threatning much theft, robbery and murthers, and many
murmurrings of the people against their Superiours, com-
plaining for want of trading, and against their heavy bur-
thens of Taxes and Tributes, (their making Bricks with-
out straw) Besides *Mars* being in a humane signe in the 3d
square of *Mercury* Lord of his place, threatens many violent
infirmities to midle aged Persons, but more chiefly the
younger sort, and of the Male kind, God preserve *London*
from the Plague and other epidemicall diseases proceeding
from the blood highly corrupted by red choller. *Mars* in
Gemini or any of the aeriall signes, &c. threatens the *Dy-*
sentery, which is a grievous and a perrilous flux, with excor-
riation and painfull wringing of the bowels, which for the
most part hath its origine through eating of fruit, through
crudities and rawnesse, and eating of sharp and sowre
meates, &c. This distemper hath born sway amongst us
these many years, and is much to be feared will do this, If
God be not mercifull, and we more penitent, and carefull.
Mars is in his dominion ruleth the *west winde*: Thus in some
measure

measure have I deciphered to you the quality Astrologically of this vernall season. *Sed noverint Astronomi Omnes pluvias earum quæ prædicuntur non evenire, Deus enim optimus maximus ipse, ac Voluntatis nostræ libertas, Cœlestium Syderum inclinationes Sæpenumerò vanas ac irritas faciunt.*

Of the Summer.

Summer begins upon Friday the 21 of *June* this year at 11 minutes past 10 a clock before noon, at which moment the Sun entreth the first minute of *Cancer*, The Horoscope being the 11 degree of *Virgo*, and the mid-heaven the fifth degree of *Gemini*, accompanied with the Dragons tail and the Bulls eye. *Mercury* is sole Lord, but he is joyned in commission with the *Moon*, he hath 31 cleer dignities, and she half as many, but the rest much fewer: they are both in Trine from moist signes, he in *Cancer*, she in *Pisces*, he on the cusp of the 11 house, and she in the angle of the *west*. *Mercury* is between the two Fortunes, but he is retrograde, and in the beginning of *Mid-Summer* week by his retrogradation he is conjunct with the Sun, for which cause and other concurring Configurations, I shall presume to predict many notable showers of rain to ensue, and this so much the more to be expected, for that at the Suns intrete into *Cancer*, he is likewise there Combust and occidentall, which position doth produce great and stormy winds, which is contrary to the naturall temper of *Summer*, and I believe the weather will prove tempestuous, stormy

and rainy, unleſſe God by his power over the benevolent *Jupiter* and *Venus* walking ſo neerly together cauſe ſome moderation thereof. As for his operations otherwiſe, he being Lord of the Aſcendant and the Mid-heaven, encompaſſed between the two fortunes *Jupiter* and *Venus*, and the Moon defluxing from him to *Jupiter*, and the Moon and *Jupiter* being in perfect Trine, and in moſt benigne reception one of another, which is an admirable poſition; It is to be hoped, and I ſo apprehend it, that both Prince and people, Superiors and Communalty will be in great love and amity and friendſhip one with another, and their affaires to proſper and ſucceed well, which are my conſtant wiſhes: Yet I know not what kind of miſchief lyes hid in the boſome of *Saturn*, who diſturbs the quiet of *Jupiter*, *Venus* and *Mercury* by projecting his Square to them from the ſecond houſe, The diſpoſitrix whereof is *Venus* and himſelf. This hath relation to the ſubſtance of the people, their proviſion, tradeing and merchandizeing, which is to be feared may be impeached, and ſome obſtructions in trade. *Sic dat dona ſua, ſicut dat mala genitſa.* This covetouſneſs is the root of all evill; I am further afraid *Latet Anguis in Herba*. The Dragons tayle in *Gemini* in the Mid-heaven, as *Guido Bonatus* will have it in his fourth part of *Aſtronomy*, Chap. 109. pag. mihi 589. *Significat quod exaltabuntur Raſtici, et calcitrabunt et inient contra Regem, et quod deludunt eum, et inſurgent contra milites ac divites ejus ſive Vicarios*, And in Chap. 107. pag. 505. *Si fuerit Cauda Draconis in d. Gem. ſignificat impedimentum regum atq; nobilium ſeu magnatum, et diminutionem honoris eorum ſeu dignitatum*, I am ſorry I have met with this obſervation, but I have told you my Author, and if he be miſtaken, I ſhall be never a whit the ſorrier, *Attamen O Præclariſſimi et Chriſtianiſſimi V.ri. Gubernatores noſtri, Capita veſtra extollite, cautiq; in rebus gerendis eſtote, ne de improviſo opprimamini, decuſſ. Veſtrum concidat.*

Of the Harvest or Autumne.

Autumne takes begining on monday the thirteenth of *September* at 13 minutes past one a clock in the morning, at what time the Sun entring the first scrupule of the Æquinoctiall signe *Libra*, the tenth degree of *Leo* ascends, and the 20 degree of *Aries* is on the midheaven: In this quarter *Mercury* continues his dominion, as he did in the *Summer*, for he is fortified with 30 dignities, and *Venus* with *Saturn* are moderators with him, enjoying 14 dignities a peece; The *Moon* and *Jupiter* are neer the ascendant, he newly risen, And it is worth the while (to early risers, or late sitters up, if the Ayre be cleare) to observe the Moon, who by reason of her latitude (yet but 26 minutes difference in longitude) yet she riseth almost 5 degrees under, and 20 minutes of time later then he; For *Jupiter* hath 26 minutes of North latitude, and the Moon 4 degrees, 26 minutes of South, The Moon departing from his conjunction, meetes with the square of *Venus*. As for the operation of these Significators this Quarter, Observe that *Mercury* being in the North Angle the fourth house, and occidentall of the Sun in *Libra*, not far from *Saturn*, who although they may forethow lofty and high windes most part of this Quarter, yet but litle rain though much is threatned, rather a good temperature and wholsome season, which is intimated likewise from the position of *Jupiter* so neer the ascendant at the Suns ingresse in square of *Venus*; *Mercury* being thus placed, and neer *Saturn*, may signifie many infirmities in the head and belly, as also in the throat and stomack, and the *Cardialgia*: He is now the

Messenger of discords and the falling out of persons who have formerly been friends, and much melancholly sadness to them especially who have any of their Radicall Significators in the begining of the last face of *Libra*, viz. Some Scribes, Secretaries, Scriveners and other Mercurialists are like to be questioned and imprisoned, and be courtesly handled. *Venus* in *Scorpio* in the fourth house, and in square of *Jupiter* portends some jealousies of Men concerning their Wives, and not without cause, for *Venus* in *Scorpio est altera Thais, altera Lais*, Lady light skirts: But Theeves and Whores meet at the Gallowes. The temperature of the ayre she causeth to be somewhat moist, as it may be observed oftimes, as the Moon meeteth with her strong configurations, and she bringeth the *South winde*. *Saturn* comes next to act his part, who being upon the very cusp of the fourth house, or the Midheaven subterranean, waiting to entertain *Mars* and the *Sun*, and in conjunction with *Spica Virginis*, hath great signification of much profit, to happen to the husbandman who takes paine in the manuring of his grounds, yet the ayre is likely to be troubled, and strange weather may happen upon his conjunction with *Mars*, which happens in the second week of *October*. But of these grand radiations, I shall give a particular Table, as I have done for the other Quarters preceding. *Potuissem observationem hujus ingressus longius et aliquo usq; extendere, sed Cynthia aurem vellit, et Plato hic me quiescere jubet. Saturn* ruleth the *East winde*.

Configurations in this Autumnall Quarter, are these.

Of

the experiment of the *Egyptians*, he calls it *Prognosticum Fertilitatis, vel Sterilitatis fructuum quorumcunque*. But I will give it in English: and it is this. For experiments sake every year, twenty or thirty days before the Cosmicall or morning rising of Procyon, or the little *Dogstar*, which with us in *England* is about the 28. or 29 of *July*, (for it is when the Sun is in the sixth degree of *Leo*, (but it varies its rising in different Meridians) although it pleased *Cardane* to say, *Canis non mordet in Anglia*:) Take a few sound seeds of what grain you please, and so many of how them in some good mould, or earth, in some convenient place, and make distinctions therein, that you may know them one from another. And (if the heat of the ayre or weather shall exceed and dry overmuch) water it opportunely or in fit season, that the seed sowed upon the dry ground, may bud forth and show it self before the rising of the said Star: This being done, diligently observe at the said Stars rising, which of the seeds so sown or set, sproues forth safe, fresh, green, and unhurt, and shall so continue, you may boldly prefage, that that sort of grain or seed shall be fruitfull, and come to good effect, but that which shall come forth faintly, withered, wrinckled, flagging, and lose its beauty or naturall colour, you may perswade your self, that that grain or seed shall be unprofitable or come to nought. *Item, quod, si grana vel semina in terram et situram Canicule sydus, per illa sua exortus cortus cursus est, in fantum et situm

Falling sickness, Apoplexies, Palsies, Fluxes of blood, Pleurisies, Vomiting of blood, Inflamation of the heart, and stomach, Wounds, and many other such like. Very often the first insult is known, by which meanes the Artist hath a large field to exercise his observations in; Therefore in these or the like diseases, Let us observe the following *Aphorisms*.

1 When the ascendant at the first time of any person falling sick shall be adverse, in opposition, square, or contranitention, to the Horoscope or Ascendant of the said parties nativity, there is little hope of life, unless there be good protections. The adverse signes also to the party falling sick, are, when the 4. 6. 7. 8. houses in his decumbiture shall be the ascendant of his Nativity, or when the ascendant of the decumbiture shall be in the signes of any of those houses in the Nativity, but this *Aphorisme* onely takes place, when the *Christian* knows the parties Geniture, which is of most excellent use. 2 When the five Hylegiacal places shall be oppressed, together with the Lord of the ascendant, Death immediatly follows, unlesse there shall be a benigne reception of the Infortunes, and other places shall also well happen, and the Fortunes likewise project their beames; If I say these things happen, The sick party shall evade his disease in a miraculous and unexpected manner. 2 He that falls sick in the howre of ♂ his infirmity proceeds from a hot cause, And if in the howre of ♄, his disease comes of a cold cause, But the common Planetary hours in this case are to be rejected, And those are to be admitted which are accompted from *Sun* rising or setting, allowing to every 15 degrees of the *Ecliptick*, one howre. 4 The Lord of the Ascendant, and Lord of the figure, combust, without doubt signifie death, except they shall be received of the ☉, or the ☉ receive them, So likewise if the ☽ be false, there is hopes of recovery in the greatest danger. 5 The Lord of the ascendant, and the ☽, with the Lord of the 8 house, without the beames of the fortunes, denotes death. 6 The Lord of the 8 in an Angle, and the Lord of the Ascendant in a cadent house, is ever deadly, but it is the more lethall, if it shall be an infortune. 7 The Moon applying to any Planet in the 8 house, is ever more deadly. 8 The Lord of the Ascendant applying to the Lord of the 8, or to stars posited therein, and the ☽ any manner of way corrupted, denotes death. 9 The Moon carrying the light of the Lord of the Ascendant, to the Lord of the 8, denotes death. 10 The Lord of the 8 in the ascendant is altogether fatall, if the Lord of the ascendant and the ☽ shall be corrupt. 11 The Lord of the ascendant in the 8, and the Moon corrupt, is death. 12 The Lord of the Ascendant posited beneath the Earth, and be in ill Aspect with the Lord of the 8, in the 8, or 4. It is a great token of death. 13 The Lord of the Ascendant, with the Lord of the 4. 6, 7. or 12. If any of these be fustrated. 14 Consider the light of the time, (for God made two great lights, the *Sun* to rule the day, and the *Moon* to rule the night.) And see whether it be well or ill posited, and judge the same, as in any *Aphorisme*, where you find the ☽ mentioned. 15 The *Black* is to be taken according to the accustomed manner, and according to his condition, judgment is to be given, as if he were the Lord of the Ascendant.

ture. 16 The Lord of the Ascendant; The *Sun*; *Moon*; and *Hyleg* happening to be in the signe of an Eclipse of that year, or of any notable or great Conjunction then in force, hath great signification of death. The signe wherein an Eclipse operating, or great Conjunction threatning evill, or the sign of the 8 house of the worlds Revolution, shall be in any of the 4 Angles, but especially the Ascendant is very deadly. 18 When a party falls sick, and an Infortune at that time do possesse the Ascendant of that parties nativity, he shall be grievously sick. 19 The Moon in the beginning of a sickneſſe, being in the signe wherein an Infortune was at the time of birth, pronoseth a very dangerous sickness: But if a fortune Judg the contrary. 20 The conjunction of the *Sun* and *Moon* at the first falling sick, especially if the *Moon* be within 6 degrees of the *Sun*, and applying, is very perilous. And if it shall happen in ♈ or ♌, it is not so bad. 21 And the *Moon* parting from the *Sun*, and gone 12 degrees, takes away much of the evill. 22 The Conjunction of the ☽ and ♄ prolongs the disease, especially when slow of course, but when swift, it is not of so long continuance: But it shall be Retrograde, and before he come to the opposition of the ☉, the party shall relapse, and the disease return. 23 The Moon in conjunction with a retrograde planet, the sick party shall be troubled much with vomiting. 23 The ☽ joyned to ♂ without the testimonies of good planets, and the disease be of a hot nature, it proves deadly for the most part, and the more if the increase in light and motion, then when she doth decrease. 24 The *Moon* joyned to a planet actuall, swift in motion, and direct, signifies the disease to be short; But if to a planet that is occidentall, slow in motion and retrograde, the contrary. 25 The Moon or Lord of the Ascendant joyned to a fortune retrograde, or by aspect, promiseth health, but the disease to be long. 26 An infortune in the Ascendant, ost time changeth the disease into another kind; But if a fortune, the disease is often cured without medicine. 27 An infortune in the Midheaven shews an unsuccessfull or ignorant *Phisition*; But a fortune there, the contrary. 28 An infortune in the 7 house, signifies the sick party shall cherish or further his disease by intemperateness in his diet, and obstinateness of will. But if a fortune be there, he will be ruled. 29 An infortune in the fourth house, shews that the medicines given will increase the disease, But if a fortune be there then they will profit. 30 The rising and setting of the greater fort of fixed stars, happening at the first demonstrate, according to their natures operate very powerfully.

These from the experimented Rules of Ptolomy, Haly, Zael, Arnoldus villanovanus, and other learned men, is found that the Angles of Heaven have greatest signification in the state of sick persons, both in the beginning of diseases, and in Questions for the sick. For at the first falling sick, the Ascendant is given to the Disease, The seventh to the sick party. The tenth house to the Phisitian, And the fourth house to the Medicines. But in Questions we give the ascendant to the Phisitian. The tenth house to the sick party. The seventh house to the medicines, And the fourth to the disease. And thus these *Aphorisme* are

Hence changed.

Hence I shall discover a rare secret, an excellent Rule if rightly understood, which is by the time of the Radical Question, (The day of the parties first falling sick being known,) find the hower of the parties falling sick. For look at the time of first radical question, what sign is in the fourth, and make it the ascendant, And that the tenth which is here the first, And the cuspe roscope shall show it self, when the party fell sick; And this is truth, if the day of the parties first falling sick be certainly known Signes of health, are, if the Lord of the Ascendant, the Moon and Irch shall be safe and not inforunated. The hower of health or ment, is, when the Lord of the Ascendant shall come to the own or exaltation, or shall be swifter in motion and direct; And the of the eighth shall be cadent, Or when the Hyleth or the Lord of the Ascendant shall retain the good aspects of the fortunes If the fortunes be well dignified in the 8, then they hurt; Also the Lord of the Hyleth, or of the place of the Moon, or Ascen shall come to the degree of the Hyleth, or the Moon, or Ascen they shall signifie health, unless they shall be infortunate, For the tunes so coming, they have their proper place, but do not de The certain hower of death, is, when the Lord of the Ascendant be joyned to the Lord of the eighth, by body, or any evill aspect. Like judg of the Moon, and the Hyleth; Also when the Lord of eighth shall come to the degree of the Ascendant or to the Hyleth.

Si quid in hoc sit, cuncti sciunt, vel si quid omissum;
Rogandus, (precor) non derisus, a nullo sit.

From my house in Crut-Church how near Bishops Gate. London, August 24. 1657.

John Booker.

Take notice that those so generally known Lozenges or Pa approved for the cure of Consumptions, Coughs, Asthmas, and all Scases incident to the lungs, are onely made by Mr. *Edmund* at his house in Katherine Court near the *Tower*, *London*, and the of those that live remote in the City, or else where, may have them of Mr. *Richard Lownds* Book-seller at the white Lyon in Church yard, with whom, some are left sealed up with Mr. Court of Aldes. This is published to prevent the designs of ing Counterfeiters, in and about the City of *London*, to and the abuse of the people.

Mathematicall Instruments either for Land or Sea, are made by *Walter Hayes* at the Cross Dagers in *Moorfields*.

Globes and Spheares of all sizes, with many excellent Mathematicall Instruments, and Books for the use of them, are to be had at Mr. *Joseph Moxons* at the signe of *Atlas* in *Cornhill*.

The English Parnassus, or an Help to English Poesy. The History of the *French* Academy. The Art of short writing by Characters, and many excellent Books are sold by *Thomas Johnson* at the golden Key in St. *Pauls* Church yard.

A Supplement to the answer of Christopher, and other new Books and Pamphlets, Sold by John Sherley, at the golden pellican in little Britain. The universal pill, and many other Chimical preparations are to be had of Mr. Major in the broad place in Buckingham
